

# DUMBARTON RAIL CORRIDOR PROJECT

## PROJECT NEED

- Local population and employment growth
- Existing automobile congestion
- Lack of multimodal transportation options
- Insufficient east-west transit connectivity
- Underutilized Dumbarton Rail Bridge

## PROJECT BENEFITS

- Enhance mobility between the East Bay and the Peninsula
- Connect to existing regional transit networks
- Provide public mass transit system
- Reduce vehicle miles traveled and greenhouse gas emissions
- Accommodate anticipated population and employment growth

## ESTIMATED CONSTRUCTION COSTS

**\$3 Billion** (Subject to change)

## ESTIMATED RIDERSHIP

**24,000 trips/day**

**7.3 million annual trips**

**Planned Operation by 2028**

## HOUSING AND EMPLOYMENT

Projected Increases by 2020

San Mateo County

# DUMBARTON RAIL CORRIDOR PROJECT

San Mateo County  
TRANSIT DISTRICT

January 2020

## ANTICIPATED SCHEDULE (Subject to change)

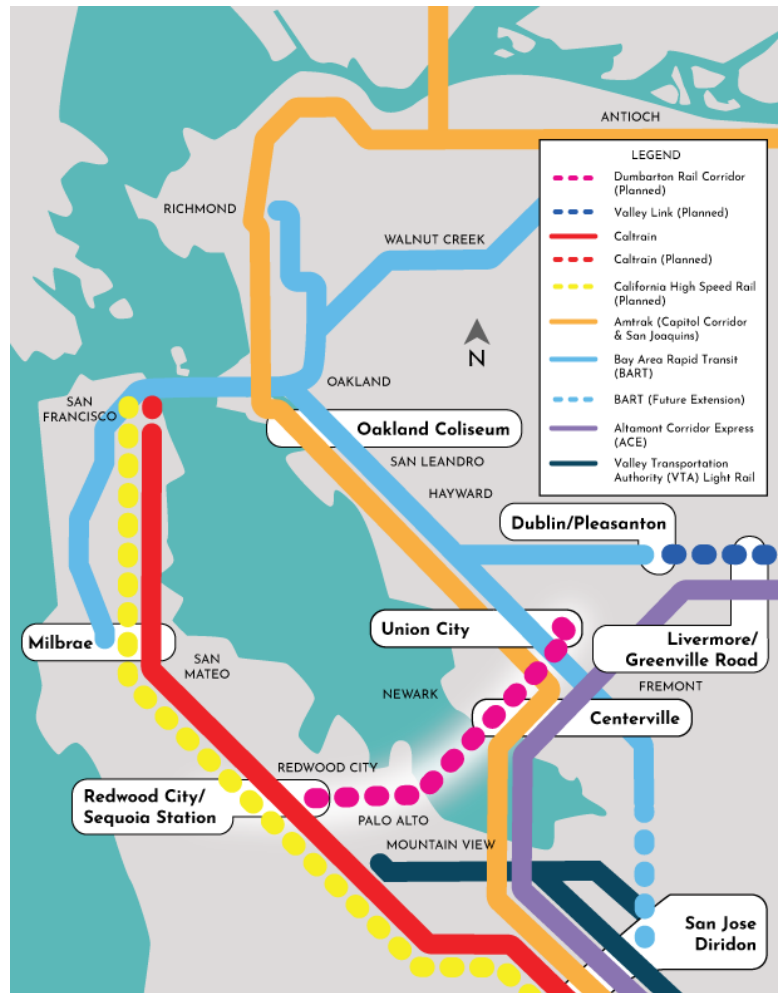

## PROJECT PARTNERS

The San Mateo County Transit District (District) and Cross Bay Transit Partners, LLC (CBTP), a partnership created by Plenary and Facebook, are engaged in a public-private partnership (P3) to improve transportation in the South San Francisco Bay Area.

## PROJECT OVERVIEW

The proposed Dumbarton Rail Corridor Project would provide a new mass transit system between the San Francisco Peninsula and the East Bay, connecting the Caltrain Sequoia/Redwood City station to the Union City BART station. Between Redwood City and Newark, the Project would primarily utilize an existing railroad right-of-way owned by the District. East of Newark, the Project would either enter a railroad corridor owned by Union Pacific Railroad, or utilize a new, dedicated corridor within public rights-of-way. The alignments under study would support one of several potential electric transit technologies, including commuter rail, light rail, and other mass transit technologies.

## REGIONAL TRANSIT CONNECTIVITY
